

Gazelle Medeo T10 and T10+ Dual Battery Kit

Two batteries, two times the range! The Gazelle Medeo T10 and T10+ have been introduced specifically for commuters. These fast bicycles are equipped with a 500Wh Powertube battery integrated into the frame. For the convenience of moderate to long-distance bike commuters, both the mid and high-step frame versions of these models can be equipped with an extra battery that clicks into place on a bracket. The Bosch PowerPack 500Wh frame-mounted battery connects directly with the Bosch system. In combination with the integrated PowerTube 500Wh battery, these bikes have 1000Wh at their disposal, allowing riders to ride twice as far. As an added bonus, the charge status of both batteries is visible on the bikes' displays.

Additionally, high step models can be equipped with an extra battery that clicks into place using the Dual Battery Kit, which is directly connected with the Bosch system. As a result, you can cycle twice as far with your Medeo. In addition, the status of both batteries is visible automatically on your display.

Dual Battery Kit-Eligible Medeo T10 and T10+ Bicycles

Bike	Frame	Size	Dual Battery Kit SKU
Medeo T10	Mid-step , High-step	45 , 50 , 55	998810000

Important comments/FAQ

General

- The Gazelle Medeo T10 and T10+ Dual Battery Kit is not supplied with the above models; this needs to be ordered by your Gazelle Dealer
- Gazelle advises and facilitates the use of the Gazelle Medeo T10 and T10+ Dual Battery in combination with a 500Wh PowerPack frame battery.
- During charging, both batteries are charged at nearly the same time. During cycling, both batteries are used at the same time.

Ordering

- The Gazelle Medeo T10 and T10+ Dual Battery Kit can be ordered as a part under number: **998810000**, by Gazelle dealers
- The Gazelle Medeo T10 and T10+ Dual Battery Kit is supplied without a battery. The associated battery is the Bosch PowerPack Frame 500Wh. This needs to be ordered separately by your dealer.

Mounting on the bicycle

- The Gazelle dealer should mount the Dual Battery kit on the bicycle and connect it to the motor system in order to prevent malfunctions in the motor system. Additionally, the guarantee is only valid for the Bosch system if the system is mounted by an authorized Gazelle dealer.
- Before mounting, carefully read the mounting instructions supplied with the Dual Battery kit.
- Once the Gazelle Medeo T10 or T10+ Dual Battery kit has been connected correctly, the Bosch system will recognize this automatically; the status of the second battery is then also visible on the display.
